

13–21 May 2023
Swiss Museum of Transport

Be part of it! Sponsorship packages 13–21 May 2023 **POWERFUEL** Week 2023

Powerfuel Week 2023 – an ambitious event concept in relation to hydrogen and synfuels, consisting of a Conference, Trade Fair, Public Days and the Synfuels Forum, fully dedicated to alternative energy systems and energy sources. It combines information with the unique facilities of the Swiss Museum of Transport, Switzerland’s most visited museum. The opening of the new “House of Energy” in April 2023 will give the Powerfuel Week completely new opportunities for raising awareness about the topic of energy among the Swiss population in the long term. Side events will also be held there. The Conference, along with the accompanying Trade Fair and the Synfuels Forum, are designed for interested specialists. The Public Days are open to the many daily museum visitors as a public event for nine days, focusing on hydrogen technology and synfuels (e-fuels).

Reach your potential customers at the Powerfuel Conference 2023. Present your company and your portfolio to leading OEMs, decision-makers, researchers and newcomers from the entire application spectrum of hydrogen, fuel cells and synfuels (e-fuels). As a partner of the Powerfuel Week, you will be in the spotlight and have the opportunity to actively shape the event. The Powerfuel Week kicks off with the pre-party, which impresses with a unique boat tour and musical as well as picturesque scenery. The evening event with dinner will take place in the aviation and space travel hall. An unforgettable networking event before the start of the Conference, Trade Fair and the Synfuels Forum.
